

SARATH KUMAR

Forward Deployed Engineer | Leading Generative AI Team | Document Intelligence & Decision Automation | LLMs, OCR, Applied AI
Bengaluru, Karnataka, India | sarathofficial11@gmail.com | linkedin.com/in/sarath-kumar-3b621316b

PROFESSIONAL SUMMARY

Forward Deployed Engineer with 7+ years of experience embedding directly with client teams to design, build, and ship AI systems that turn unstructured data into reliable, production-grade business outcomes. Currently leading the Generative AI team at Mphasis, driving enterprise-scale document intelligence and decision automation in the financial domain, combining OCR/ICR and LLM-based pipelines to process high volumes of complex data with accuracy, scalability, and production readiness. Background spans Conversational AI, Contact-Center-as-a-Service (CCaaS) platforms, and cloud contact center modernization, with hands-on expertise in AWS, Kore.ai, Generative AI, prompt engineering, and Retrieval-Augmented Generation (RAG). Skilled at working directly with customers to translate ambiguous, high-stakes problems into deployed solutions, owning system architecture, project planning, and applied AI trade-offs (accuracy, latency, cost) end to end.

CORE SKILLS

Leadership & Delivery: Forward Deployed Engineering, Generative AI Team Leadership, Client-Facing Delivery, Technical Roadmap & Architecture Ownership

AI / ML: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Generative AI, Machine Learning, OCR / ICR, Document Intelligence

Conversational AI / CCaaS: Kore.ai, Amazon Connect, Google CCAI / DialogFlow, Amazon Lex v2, Virtual Agents, Contact Center Modernization

Cloud & Engineering: AWS, Python, Node.js, Java, System Design, Data Visualization

WORK EXPERIENCE

Senior Software Engineer — Forward Deployed Engineer, Leading Generative AI Team Feb 2025 – Present

Mphasis | Bengaluru, Karnataka, India

- Lead the Generative AI team, embedding directly with client stakeholders as a Forward Deployed Engineer to scope, build, and ship enterprise-scale AI systems within the financial domain.
- Own the technical roadmap for document intelligence and decision-oriented workflows, guiding the team on architecture, prioritization, and delivery.
- Direct the design of OCR/ICR and LLM-based extraction, validation, and summarization pipelines to process high volumes of complex, unstructured data.
- Accountable for accuracy, scalability, and production-readiness across data → validation → business-action workflows in a regulated environment.
- Partner with clients and cross-functional stakeholders on system architecture and project planning, balancing accuracy, latency, and cost trade-offs for applied AI in production.

Senior Software Development Engineer May 2024 – Jan 2025

MResult Tech | Bengaluru, Karnataka, India

- Developed advanced chatbots and cloud applications, integrating Generative AI to optimize user interactions and data storage, retrieval, and processing.
- Applied Retrieval-Augmented Generation (RAG) models to give AI systems access to real-time data, improving response quality and decision-making.
- Managed data ingestion into vector databases, ensuring scalability, speed, and accuracy for downstream retrieval.
- Built intelligent, adaptive systems that continuously learn and improve, enhancing user experience and driving business innovation.

Conversational AI Developer – Generative AI Mar 2024 – May 2024

Skilliantech (CTH Genpact) | Bengaluru, Karnataka, India

- Designed and developed Conversational AI solutions on Kore.ai, applying Generative AI to create engaging customer experiences.
- Collaborated cross-functionally to streamline processes, optimize chatbot performance, and improve customer satisfaction and retention.

Management Consulting Analyst Oct 2021 – Dec 2023

Accenture | Bengaluru, Karnataka, India

- Led transformation of a US banking client's contact center onto a cloud-based Amazon Connect architecture.
- Integrated Conversational AI-powered Lambdas for secure data tokenization using Protegrity technology.
- Built a comprehensive IVR customer journey reporting system with VistaString and resolved Lex v2 intent ambiguity via a PutBotSession proof-of-concept.
- Engineered complex Lex v2 Lambda solutions and multiple conversational interfaces (chatbots, voice bots, virtual agents) to enhance customer interactions.
- Designed and built a Lambda load-testing tool simulating 1,000+ concurrent users using advanced multiprocessing techniques.
- Delivered a versatile SOAP API solution across Python, Node.js, and Java to meet diverse language requirements and optimize performance.

Associate Engineer Technology Jul 2019 – Oct 2021

Virtusa Consulting | Chennai, Tamil Nadu, India

- Transformed a US auto insurance client's contact center onto a cloud-based Amazon Connect infrastructure, including Holiday Management and Voicemail modules.
- Developed and launched an AI-powered chatbot for a US health insurance client, improving issue resolution and reducing ITSM team workload.
- Drove R&D within the Center of Excellence, integrating cloud contact centers with Facebook, WebEx, Telegram, and WhatsApp.
- Built a Conversational AI bot using Google DialogFlow/Google CCAI for an Australian grocery retailer's Facebook page, streamlining product access for customers.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

Knowledge Institute of Technology (KIOT), Salem, India | 2015 – 2019

CERTIFICATIONS

- Solution Training for Amazon Connect
- Data Science Methodology
- Data Analysis with Python
- Open Source Tools for Data Science
- Introduction to Migrating Databases and Virtual Machines to Google Cloud Platform
